

Tourism Trinidad will be participating in the upcoming FCCA or Florida-Caribbean Cruise Association Conference in Mazatlán, Mexico, from November 7th to 10th, 2023. This conference is a unique opportunity for the company to connect with cruise industry leaders and cruise line executives.

The FCCA conference is renowned for offering valuable insights into the cruise industry and its inner workings. It is a hub for cruise tourism professionals to enhance their knowledge, foster connections, and promote their products and services. With approximately 100 executives from FCCA Member Lines attending, this event provides a golden opportunity to engage with decision-makers who determine cruise ship itineraries, onboard offerings, and destination investments.

Attendees are also organisations interested in doing business with the cruise industry, including Ports & Destinations, Cruise & Tourism Agencies, Tour Operators, Attractions, Suppliers, and Ship Agents.

Conferences like these are both important and lucrative. Following our attendance in 2022, Trinidad and Tobago was able to register a 51 percent increase in cruise passenger arrivals which promises to make the 2023-2024 Cruise Ship season a successful one. The season has already kicked off with the arrival of the Seabourn Pursuit on October 11th and the soon to arrive Ruby Princess on November 14th. This is just the beginning of a season that will see 5 new cruise lines grace our shores.

When cruise tourists grace our shores, they will also experience our enchanting attractions and opportunities that Trinidad and Tobago has to offer. As a member of the FCCA, we are committed to promoting Trinidad as a must-visit cruise destination in the Caribbean region.
